PROFESSIONAL SUMMARY

Full-stack developer and Computer Science graduate with hands-on experience in web development, mobile development and data science. Proven track record building high-precision computation engines and open-source libraries published on Packagist and PyPI. Adept at delivering clean, maintainable code and integrating AI APIs into production systems.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, Java, Go, C, C++, Dart
Frontend: React, Next.js, Vue.js, AngularJS, Tailwind CSS, Bootstrap, SCSS, WebGL, HTML, CSS
Backend: Laravel, Node.js, Express.js, FastAPI, Flask, Django, JWT
Databases: MySQL, PostgreSQL, SQLite, MongoDB
Mobile: Flutter, Android (WebView/Java)
DevOps & Tools: Git, GitHub, GitLab, Nginx, Postman, Vite, VS Code, Linux, PowerShell
AI/ML & Data Science: PyTorch, TensorFlow, Keras, OpenCV, scikit-learn, Pandas, HuggingFace, NLP
AI Media & Generative: Stable Diffusion, GFPGAN, RealESRGAN, CodeFormer, UVR
Design & Creative: Figma, Adobe Creative Cloud, Canva
Other: FFI, ctypes, REST API design, SQLAlchemy, Alembic, AI API integration

WORK EXPERIENCE

Shreesofttech <i>Laravel Developer</i>	Dec 2024 – Present Hybrid
WRTeam <i>PHP Developer Intern</i>	May 2024 – June 2024 Remote
- Engineered and maintained a PHP web application, improving codebase efficiency by 50%+ through dynamic fetching optimizations that significantly reduced file count and code volume. - Collaborated on integrating front-end and back-end systems, accelerating delivery timelines.	
CodSoft <i>Flutter Developer Intern</i>	Jun 2024 – Jul 2024 Remote
- Built 4 cross-platform Flutter applications covering diverse domains, enhancing user engagement through polished UI and smooth navigation. - Conducted code reviews and optimized app performance across Android and iOS targets.	
CodSoft <i>Python Programming Intern</i>	May 2024 – Jun 2024 Remote
Developed 5 Python applications spanning user management, game logic, security, arithmetic, and task management, implementing 3 new features that improved robustness by 30%.	
CodSoft <i>Data Science Intern</i>	May 2024 – Jun 2024 Remote
- Analyzed 5 datasets and produced 55 visualizations using Pandas, Matplotlib, and Seaborn to surface actionable insights. - Trained and evaluated predictive ML models achieving 85%+ accuracy.	

PROJECTS

Panchang Core <i>PHP, FFI, JME Ephemeris</i>	GitHub
Architected a high-precision Hindu calendar engine using a JME Ephemeris FFI bridge and IEEE 754 doubles to compute Tithi, Nakṣatra, Yoga, Karaṇa, and 30 Muhūrtas with 0.001 arcsecond accuracy.	

- Implemented KalaNirnaya logic orchestrating 323 unique festivals and 85 unique vrat identities across Amanta/Purnimanta calendars with English, Hindi, and Gujarati output.
- Designed a framework-agnostic architecture deployable as a standalone CLI or as a Laravel package via native Facades and Service Providers.

JME Ephemeris Engine

[GitHub](#)

C, Astronomy, JPL, CALCEPH

- Developed an independent MIT-licensed ephemeris engine with 204 public functions and 462 constants.
- Implemented multiple computation backends including JPL/CALCEPH, Moshier, VSOP87, ELP2000, and Meeus.
- Designed strict engine-selection architecture supporting JPL, MOSHIER, VSOP_ELP_MEEUS, and AUTO modes.
- Built the native foundation powering PHP, Python, and Dart language ecosystems.

JME Cross-Language SDK Ecosystem

[GitHub \(PHP\)](#) | [GitHub \(Python\)](#) | [GitHub \(Dart\)](#)

PHP, Python, Dart, C

- Published native bindings and packaged runtimes across PHP, Python, and Flutter/Dart.
- Delivered consistent access to the same C API across multiple programming languages and operating systems.
- Eliminated manual compilation by distributing platform-specific binaries for end users.

Hindu Scriptures

[GitHub](#) | [Live demo](#)

Node.js, Express.js, JavaScript, Google Gemini AI, Java

- Built a full-text scripture search platform with AI-powered search via Google Gemini 2.5 Flash API and URL-rewriting-based multilingual translation through Google Translate.
- Delivered both a web app and an Android WebView app, serving original Devanagari content with on-demand translation to multiple languages.

Enhanced Precision Grayscale Converter

[GitHub \(Web\)](#) | [Live demo](#)

Python, FastAPI, Tailwind CSS, JavaScript, Axios

- Engineered a FastAPI backend supporting 7 color-science modes (Rec.709, BT.601, BT.2100, HSL, HSV, L*a*b*, Gamma) with 8/16-bit output in PNG, JPEG, HEIC, TIFF, WEBP, and BMP.
- Developed a responsive frontend with Axios-powered live previews, drag-and-drop, and EXIF/ICC preservation toggles; fully self-hosted with no third-party uploads.

Laravel Gemini AI Translation Extractor

[GitHub](#)

PHP, Laravel, Google Gemini AI, spatie/fork

- Developed an Artisan command that scans Blade/PHP/JS/TS sources for translation keys, generates Laravel PHP & JSON language files via Gemini 2.0 Flash-Lite, and runs concurrent fork-based requests with auto-retry on rate limits.

PostalKit

[GitHub](#)

Python, ctypes, FFI, libpostal

- Delivered a strict 1:1 ctypes wrapper for the OpenVenues libpostal C library (46 functions, 10 structs, 42 flags) with first-run auto-download of ~2 GB ML models and OS-specific binaries, bypassing all manual toolchain setup.

Literary & Linguistic Poetry Analyzer

[GitHub](#)

Python, FastAPI, PyTorch, HuggingFace

- Designed an async FastAPI backend orchestrating 1.5 GB+ HuggingFace Transformer models, spaCy, NLTK, and Stanza for multilingual sentiment, emotion, and phonological classification.
- Implemented SQLAlchemy ORM connection pooling for SQLite, PostgreSQL, and MySQL/MariaDB, with Alembic schema migrations for production-ready scalability.

Crop & Nutrient Recommendations Apps

[GitHub \(Crop\)](#) | [GitHub \(Nutrient\)](#)

Python, Flask, Google Gemini AI, HTML, CSS, JavaScript

- Built two Flask applications powered by Google Gemini 2.0 Flash Lite: one recommending crops by factoring in weather, soil, and water needs; the other generating personalized daily caloric and nutrient targets from user biometric inputs.

Recipe App

[GitHub](#)

Flutter

- Built a cross-platform Flutter recipe browser with search, filtering, and a user-friendly detail view.

Portfolio

[GitHub](#) | [Live demo](#)

HTML, CSS, JavaScript, Tailwind CSS

- Designed and deployed a personal portfolio showcasing projects, skills, and professional background.

EDUCATION

Parul University

B.Tech in Computer Science and Engineering
CGPA: 7.29

Vadodara, Gujarat, India
2021 – 2025

CERTIFICATIONS

- [PHP Developer](#)
- [Python Programming](#)
- [Data Science](#)
- [Flutter Developer](#)
- [Data Analytics with Python](#)
- [Laravel](#)

SOFT SKILLS

Analytical Thinking, Problem Solving, Attention to Detail, Research, Time Management, Adaptability, Communication, Teamwork, Leadership
